Forecast for Friday 02 Dec 2022

Weather: Mostly dry and mainly cloudy overnight and on Friday. Thicker patches of cloud may produce a little drizzle. Best of any brightness will be over hills towards the West Coast.

Chance of cloud-free hill tops above 800m: 60%, best chances in west of area.

Low cloud and visibility: Extensive cloud cover around 700 to 800m, thinning and lifting at times, especially in west. Generally good visibility beneath the cloud cover although patches of poorer visibility in association with any drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Strong winds especially at first, combined with temperatures close to freezing on higher tops will make it feel bitterly cold.

Forecast for Saturday 03 Dec 2022
Weather: Clouds thickening during the morning with some light rain and drizzle breaking out for a time. Becoming dry again in the evening with clear periods developing.

Maximum wind: South or southeast winds, average speeds of 15 to 20mph with gusts 30mph on the tops.

Chance of cloud-free hill tops above 800m: 40%.

Low cloud and visibility: Good visibility with canopy of cloud about 800m lowering by the afternoon to about 600m. It will turn hazy beneath the cloud with poor visibility in more persistent rain. Good visibility returning in the evening with clouds lifting and breaking up.

Temperature: **Glens:** Plus 4 Celsius rising to 10 Celsius.
At 800m: Plus 4 Celsius.
Freezing level: 1300m.
